Fidelity Global Balanced Portfolio

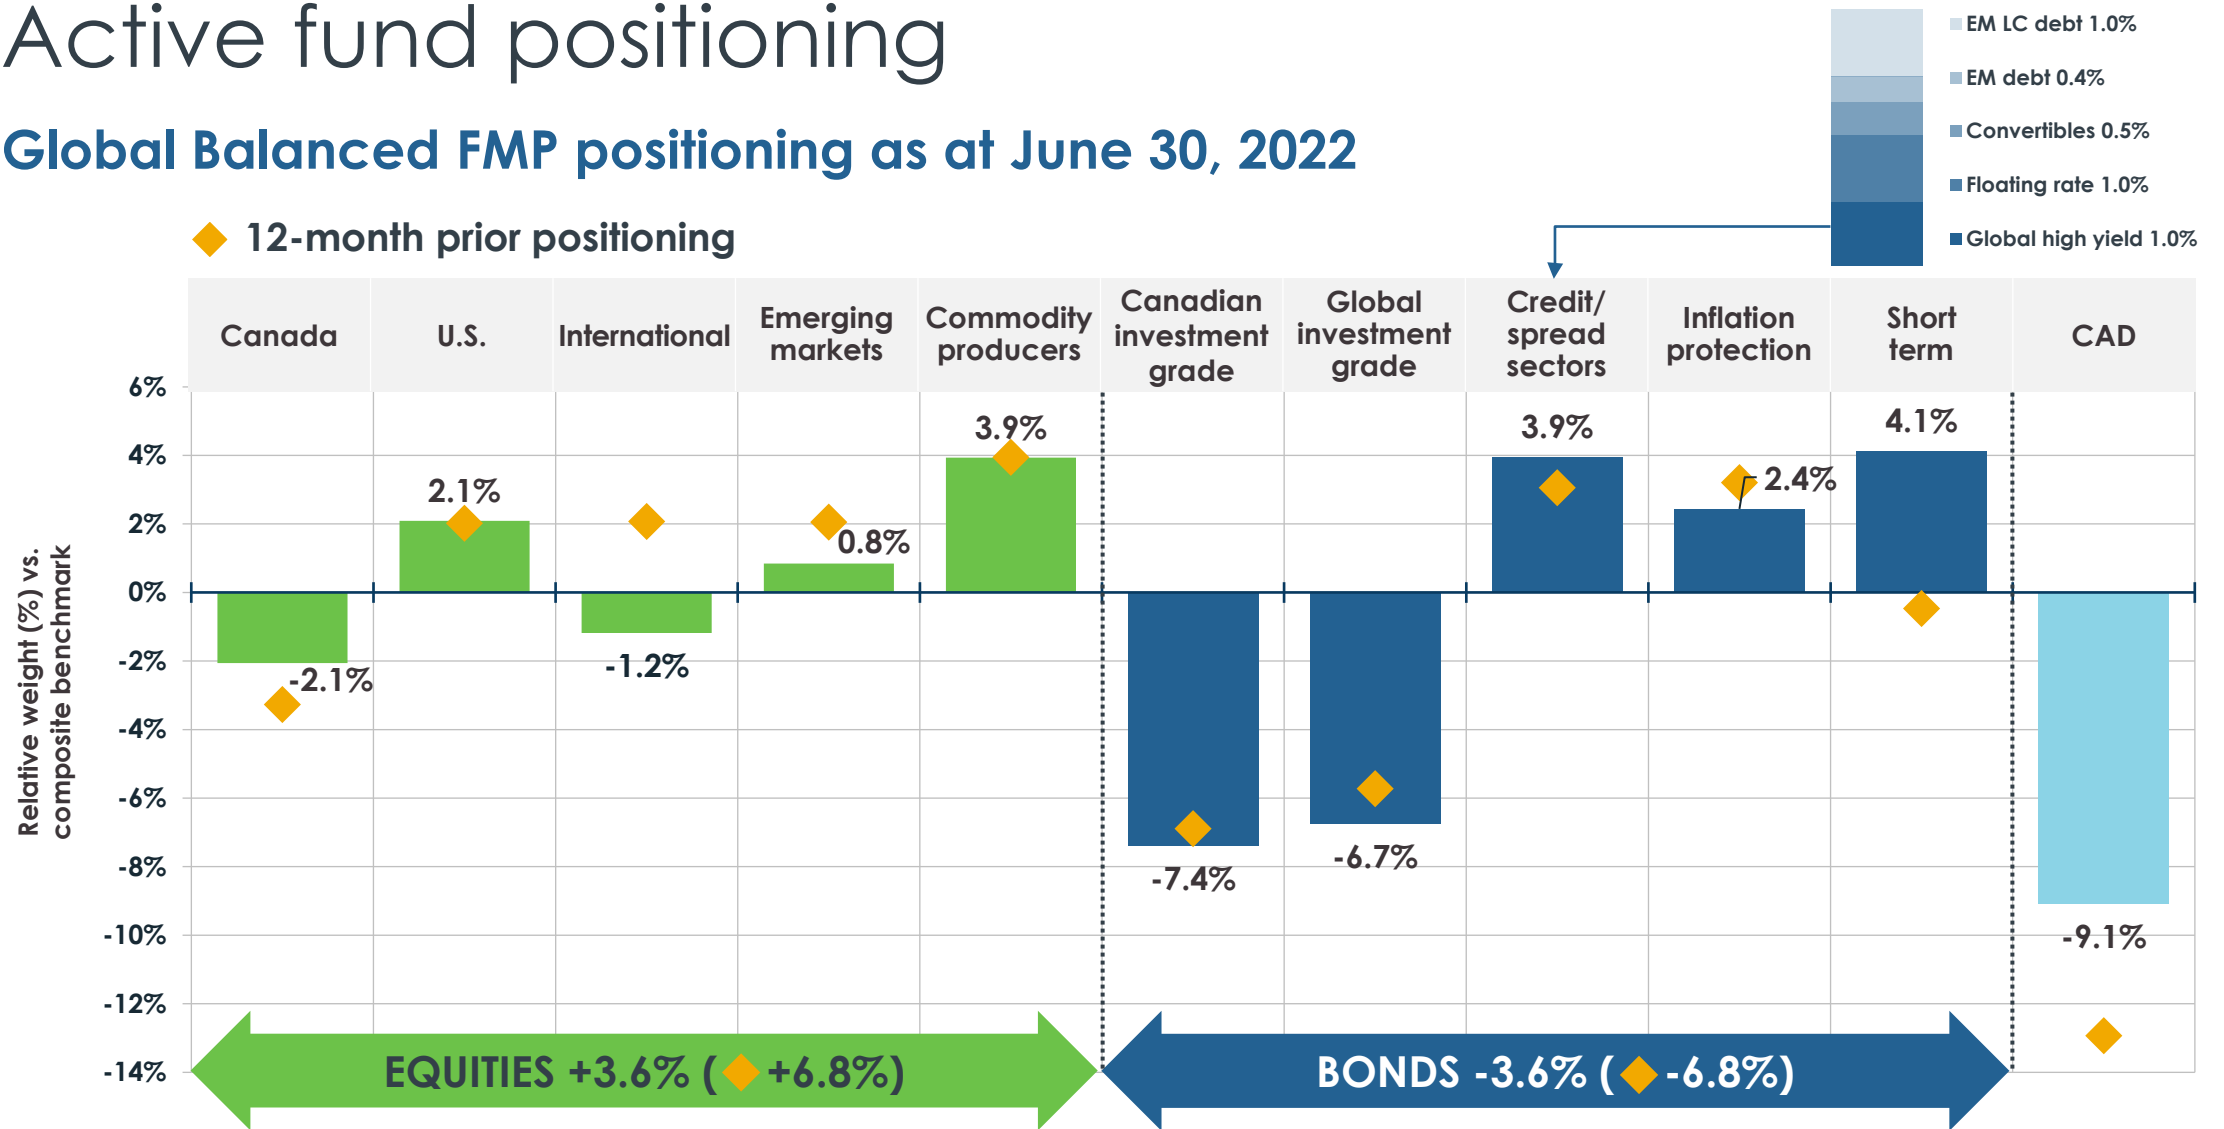

Performance attribution of Fund since introduction of current mandate

Source: Fidelity Investments Canada ULC. For illustrative purposes only. For Canadian investors who have zero global exposure, the example highlights the advantage of global diversification. A general Canadian balanced portfolio of stocks and bonds is compared to the Fidelity Global Balanced Portfolio, which includes global asset classes to diversify the portfolio. Performance shows cumulative returns as at June 30, 2022 (Series F), net of fees, in Canadian dollars. The annualized returns are as follows: Fund 6.3%; Fund's benchmark 6.3%; general 60/40 Canada portfolio 5.2%. Value added shown at right comprises three elements: 1. The strategic benchmark, which reflects the neutral asset mix of the Global Balanced Portfolio; the value added is shown net of Series F fees for the Fund, since this would be the expected excess return of the Fund over the general 60/40 Canada portfolio absent active management, 2. security selection, which reflects the contribution of active equity and fixed income management of the underlying Funds to the overall Global Balanced Portfolio return, and 3. asset allocation, which reflects the tactical tilting of the Fund's asset class exposures over time relative to its neutral mix. Fidelity Global Balanced Portfolio's strategic benchmark consists of 21% S&P/TSX Capped Composite Index, 39% MSCI All Country World ex Canada Index, 23% Bloomberg Global Aggregate Bond Index, 12% FTSE Canada Universe Bond Index and 5% FTSE Canada 91-Day T-Bill Index. The Fidelity Managed Portfolios changed from a static asset allocation approach to a tactical asset allocation strategy with +/- 15% bands in October 2013. General 60/40 Canada portfolio is made up of 60% S&P/TSX Composite Index and 40% FTSE Canada Universe Bond Index. See additional disclosures on important notice slide.

Active fund positioning

Global Balanced FMP positioning as at June 30, 2022

Source: Fidelity Investments Canada ULC. Fidelity Global Balanced Portfolio's blended benchmark consists of 21% S&P/TSX Capped Composite Index, 39% MSCI All Country World ex Canada Index, 23% Bloomberg Global Aggregate Bond Index, 12% FTSE Canada Universe Bond Index and 5% FTSE Canada 91-Day T-Bill Index. Positioning is as at the date noted and is subject to change.

Important notice

Commissions, trailing commissions, management fees, brokerage fees and expenses may be associated with investments in mutual funds and ETFs. Please read the mutual fund's or ETF's prospectus, which contains detailed investment information, before investing. The indicated rates of return are historical annual compounded total returns for the period indicated including changes in unit value and reinvestment of distributions. The indicated rates of return do not take into account sales, redemption, distribution or option charges or income taxes payable by any unitholder that would have reduced returns. Mutual funds and ETFs are not guaranteed. Their values change frequently, and investors may experience a gain or a loss. Past performance may not be repeated. If you buy other series of Fidelity Funds, the performance will vary, largely due to different fees and expenses. Investors who buy Series F pay investment management fees and expenses to Fidelity. Investors will also pay their dealer a fee for financial advice services in addition to the Series F fees charged by Fidelity.

The statements contained herein are based on information believed to be reliable and are provided for information purposes only. Where such information is based in whole or in part on information provided by third parties, we cannot guarantee that it is accurate, complete or current at all times. It does not provide investment, tax or legal advice, and is not an offer or solicitation to buy. Graphs and charts are used for illustrative purposes only and do not reflect future values or returns on investment of any fund or portfolio. Particular investment strategies should be evaluated according to an investor's investment objectives and tolerance for risk. Fidelity Investments Canada ULC and its affiliates and related entities are not liable for any errors or omissions in the information or for any loss or damage suffered.

From time to time a manager, analyst or other Fidelity employee may express views regarding a particular company, security, and industry or market sector. The views expressed by any such person are the views of only that individual as of the time expressed and do not necessarily represent the views of Fidelity or any other person in the Fidelity organization. Any such views are subject to change at any time, based upon markets and other conditions, and Fidelity disclaims any responsibility to update such views. These views may not be relied on as investment advice and, because investment decisions for a Fidelity Fund are based on numerous factors, may not be relied on as an indication of trading intent on behalf of any Fidelity Fund.

The rate of return shown is used to illustrate the effects of the compound growth rate and is not intended to reflect future values of the fund or returns on investment in any fund.

Important notice

Certain statements in this commentary may contain forward-looking statements (“FLS”) that are predictive in nature and may include words such as “expects,” “anticipates,” “intends,” “plans,” “believes,” “estimates” and similar forward-looking expressions or negative versions thereof. FLS are based on current expectations and projections about future general economic, political and relevant market factors, such as interest, and assuming no changes to applicable tax or other laws or government regulation. Expectations and projections about future events are inherently subject to, among other things, risks and uncertainties, some of which may be unforeseeable and, accordingly, may prove to be incorrect at a future date. FLS are not guarantees of future performance, and actual events could differ materially from those expressed or implied in any FLS. A number of important factors can contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition and catastrophic events. You should avoid placing any undue reliance on FLS. Further, there is no specific intention of updating any FLS, whether as a result of new information, future events or otherwise.

Currency neutral funds use derivatives to mitigate the funds' exposure to changes in exchange rates between developed market currencies and the Canadian dollar. The investment approach used by the funds, while effective in reducing exchange rate risk, will not completely eliminate the impact of currency fluctuations. The funds' returns will differ from the local currency returns of their underlying funds.

Slide 2: If you buy other series of Fidelity Funds, the performance will vary, largely due to different fees and expenses. Investors who buy Series F pay investment management fees and expenses to Fidelity. Investors will also pay their dealer a fee for financial advice services in addition to the Series F fees charged by Fidelity. Morningstar ratings reflect performance as at June 30, 2022, and are subject to change monthly. The Morningstar Risk Adjusted (MRARs), commonly referred to as the Star Ratings, relate the risk-adjusted performance of a fund to its peers with the same CIFSC Fund category for the period ended as noted and are subject to change monthly. Morningstar calculates ratings for categories with at least five funds. To determine a fund's rating, the fund and its peer are ranked by their MRARs. If a fund scores in the top 10% of its category, it receives five stars (High); if it falls in the next 22.5% , it receives four stars (Above Average); the next 35% earns a fund three stars(Neutral or Average); those in the next 22.5% received two stars (Below Average); and the lowest 10% received one star (Low). The overall rating is a weighted combination of the three-, five- and ten-year ratings. For greater detail see www.morningstar.ca

Slide 3: General 60/40 Canada portfolio is made up of 60% S&P/TSX Composite Index and 40% FTSE Canada Universe Bond Index, rebalanced monthly. Periods greater than one year have been annualized. Performance as at June 30, 2022 (Series F), net of fees, in Canadian dollars.

Index	Period ending	1M	3M	6M	1Y	3Y	5Y	10Y
S&P/TSX Capped Composite Index	June 30, 2022	-8.7	-13.2	-9.9	-3.9	8.0	7.6	8.2
FTSE Canada Universe Bond Index	June 30, 2022	-2.2	-5.7	-12.2	-11.4	-2.3	0.2	1.7
